## **Why Stay in the Dark?**

Therm-App® Hz improves effectiveness in the field, providing clear images in total darkness—delivering mission critical information which can save lives. The compact and lightweight camera with interchangeable lenses enables users to record and immediately share high-quality thermal images and videos. Connecting to most Android smartphones, it offers superb image quality and low power consumption.

### **Long range detection**

Detect human size targets up to 500m  
Detect vehicle size targets up to 1,500m

### **Interchangeable Lenses**

Therm-App® Hz offers a variety of lenses to match specific operational needs. Currently available: 6.8/13/19/35mm lens options.

### **Modular**

Compatible with head-mounts, tripods, handles and other standard 1/4"-20 mounts.

# Improve situational awareness and enhance safety with long-range detection and recognition capabilities.

## Security

See the unseen while on routine perimeter patrol, securing a facility, or identifying potential threats in dark or badly lit areas. It's easier to control and secure a perimeter, by obtaining clear images of people, animals, or vehicles at the scene.

## Law Enforcement

Improve situational awareness and enhance safety while on patrol, responding to distress calls, exiting patrol vehicles, and entering buildings. Identify perpetrators trying to avoid detection or fleeing the scene.

## Wildlife

Obtain a clear view of animals in the wild, irrespective of lighting or weather conditions— through high grass, dense brush, or forested areas.

## Search and Rescue

Locate injured or unconscious people on land or in water, in any weather or environmental conditions such as fog or smoke. Detect signs of life even in thick foliage or wooded areas, day or night.
